

The most affordable phone system is now here

feature rich
maintenance free
super low cost

Consider the advantages that a new digital next generation VOIP phone system can bring to your business....

- Major reduction in monthly Telephone costs and each monthly bill is the same
- All of North America is now a local call. No more long distance charges
- Never miss a call. While away from the office calls can be discreetly redirected to your cell phone and handled anywhere anytime
- Office voice mail messages can be e-mailed to you as an audio file
- Auto Attendant answers and handles all calls and makes it easy to speak to the right person (replaces a receptionist and has Music on hold feature)
- Conference calling. Paging feature, Intercom, Day/night mode, Holidays etc.
- Do not disturb feature. Caller ID Blocking. Training mode (listen in)
- Call Twinning. Your office phone and cell phone ring at the same time
- Detailed call records can be emailed to you or viewed online. Great for monitoring employee telephone activities
- Eliminate cell phone long distance charges (this can offer huge savings)
- Take one of your phones with you and receive calls anywhere in the world as if you were in your office
- **Talk to us...** You'll be amazed how much you can save & how little it costs for useful phone features that previously only larger corporations could afford.
