

The most affordable phone system is now here

feature rich
maintenance free
super low cost

Consider the advantages that a new digital next generation VOIP phone system can bring to your business....

Like Saving you 30% to 50% every month off your current Phone Bill...Plus giving you ton's of free features that your current provider charges extra for... When is the last time you looked at your phone bill. Half those charges make no sense. They're just a money grab.

With a Skyview VOIP Phone System every monthly phone bill is the same. No surprises. All of North America is now a local call. No more long distance charges. Calls can automatically be transferred to your cell phone when your away from your office too. And as if saving money isn't enough incentive, Check out our Voip Phone **included features** compared to what your current phone service provider charges you extra for. You're entitled to these FREE features. Stop paying extra for them now!

Partial List of Key **Included** Features

- * Long Distance Charges: No More...Canada and United States are now a local call
- * Call Display, Call Answer, Call Waiting,
- * Call Transfer, Call Forward (even to your cell phone unbeknownst to your caller)

This high quality phone system is awesome. We'll program it for you with free features that will help you operate like a PRO. Even a small company can appear like a big player with this Voip Phone System. It will allow you to be more productive and professional in your daily activities and create a favourable impression when people call you. There's nothing worse in this day and age than getting a busy signal when calling a business or getting an outdated announcement from a 10 year old answering machine. Create the impression that will make people want to deal with you with a Low Cost VOIP Phone System from Skyview Electronics. We'll take care of everything. Install it, show you how easy it is to use & start saving you money from day one.
